SET B

SRM Institute of Science and Technology
College of Engineering and Technology
School of Computing

SRM Nagar, Kattankulathur – 603203, Chengalpattu District, Tamilnadu

Academic Year: 2025-26 (ODD)

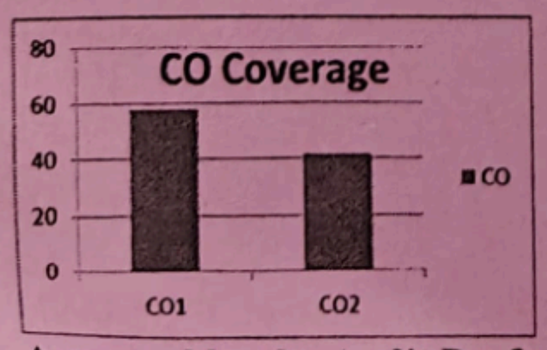

Test: FT II
Course Code & Title: 21CSS201T/Computer Organization and Architecture
Year & Sem: II Year / III Sem

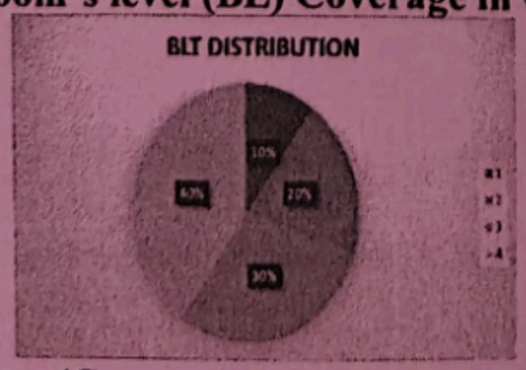

Date: 15.09.25
Duration: 2 Hours
Max. Marks: 50

Part – B
(4 x 10 =40 Marks)
Answer any FOUR Questions

6	(i) Ravi wants to design a new number system with "0,1,2,3,4,5" as the basic digits . Help him in (a) Finding the base for his new number system (1mark) (b) Generating the first 20 numbers in that number system (2 marks) (c) Convert the decimal number 20 to the new number system (1 marks) (ii) convert 67.687 to binary number system (3 marks) (iii) convert 111011.1101 to decimal number system (3 Marks)	10	3	1	1	1.1.2
7	(i) Find the product of the given decimal number 15.75 and 14.25 and the result in binary number system (5 marks) (ii) Perform division on 18.5 by 6 in the binary number system (5 marks)	10	3	1	1	1.1.2
8	(i)Add the following BCD numbers 237.75 and 486.25. (5 marks) (ii)Subtract the following BCD numbers 275.5 from 422.25. (5 marks)	10	3	1	1	2.2.1
9	(i) Differentiate the following statements (4 marks) (a) ADD A,B,C (b) ADD A,B (c) ADD A (d) ADD (ii) A system has 64 GB of memory and is word addressable. The size of each word is 16 bytes. Find the size of the address bus for this system. (3 marks) (iii) Describe Index addressing with suitable example. (3 marks)	10	4	2	2	2.2.1
10	With a neat sketch, describe the architecture of 8086 microprocessor.	10	2	2	2	2.2.1

Course Outcome (CO) and Bloom's level (BL) Coverage in Questions

Approved by the Audit Professor/Course Coordinator
