College of Engineering and Technology
School of Computing

DEPARTMENT OF COMPUTING TECHNOLOGIES
SRM Nagar, Kattankulathur – 603203, Chengalpattu District, Tamil Nadu
Academic Year: 2024-2025 (ODD)

Test: QUIZ-2 &3 **Date: 04/10 /2024**
Course Code & Title:21CSE203P - Advanced Programming Practices **Duration:** 20 Min
Year & Sem: II year & III Sem SET: D **Max. Marks:** 10

S.No	Question	Answer

1.	What will be the output of the following code?
	
	class MyRunnable implements Runnable {
	public void run() {
	for (int i = 0; i < 3; i++) {
	
	System.out.println(Thread.currentThread().getName()
	+ " is executing task " + i);
	}
	}
	public static void main(String[] args) {
	Thread t1 = new Thread(new MyRunnable(), "Thread-1");
	Thread t2 = new Thread(new MyRunnable(), "Thread-2");
	t1.start();
	t2.start();
	}
	}
		main
		main
		Thread-0

2.	Which of the following is not a type of JDBC driver? a) Type 1: JDBC-ODBC Bridge Driver b) Type 2: Native-API Driver c) Type 3: Network Protocol Driver d) Type 5: Database Protocol Driver	Option 4
3.	Which of the following methods is used to move the ResultSet cursor to the next row? a) next() b) move() c) getRow() d) fetch()	Option 1
4.	Consider a system with a single-core CPU where Task A and Task B are both running. Task A starts running first, then pauses to wait for an I/O operation. While Task A is paused, Task B starts running. Once the I/O operation is complete, Task A resumes execution, and both tasks continue to be interleaved. What type of execution is happening in this scenario?	Concurrent Execution
5.	What will be the output after its execution? public class main { public static void main(String args[]) { Thread thread1=Thread.currentThread(); thread1.run (); Thread thread2=Thread.currentThread(); Thread2.run (); System.out.print(Thread.activeCount()); }}	Ans :1

6.	A ____ control is a dialogue window that allows the user to pick a file? A. JChoosFile B. JFilefield C. JFile D. JFileChooser	Option 4
7.	For the program given below, what will be the output after its execution? % Facts parent(john, mary). parent(mary, alice). parent(mary, bob). % Rule grandparent(X, Y) :- parent(X, Z), parent(Z, Y). % Query Example ?- grandparent(john, alice).	Ans : True

8.	def double(x):
	return x * 2
	
	def applyFunction(func, value):
	return func(value)
	
	result = applyFunction(double, 10)
	print(result)
	
	What will be the output after its execution?
		Ans:20

9.	def make_multiplier(n):
	def multiplier(x):
	return x * n
	return multiplier
	
	double = make_multiplier(2)
	triple = make_multiplier(3)
	
	print(double(5))
	print(triple(5))
	
	What will be the output after its execution?
		Answer: 10 15

10.	numbers = [1, 2, 3, 4, 5, 6] even_numbers = list(filter(lambda x: x % 2 == 0, numbers)) print(even_numbers) What will be the output after its execution?	Answer: 2, 4, 6
